

# EasyDrive

The Organizational Hub for Centralized Data Storage

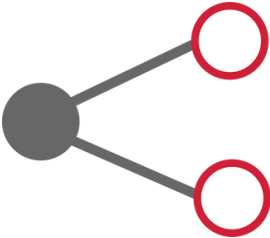

### Triage

Effortlessly sort finished projects and quickly isolate unneeded slides, streamlining the organization process for high-volume labs to save time and improve productivity.

### Library

Keep your slide collection systematically organized for easy access with advanced search capabilities, ensuring your slides are well-cataloged and easily retrievable to enhance overall productivity.

### Share

Share slides effortlessly with secure, TinyURL-style links that protect slide integrity, facilitating collaboration with colleagues and experts by allowing easy sharing of individual slides or sets of slides.

### Archive

Safeguard unique samples with reliable long-term storage, keeping your valuable data organized and easily accessible for future reference while ensuring critical data is backed up and preserved for ongoing research and study.

## Share

EasyDrive facilitates seamless external reviews by enabling pathologists to securely share slides with external experts using TinyURL-style links. This ensures that second opinions and expert consultations are easily accessible, improving the accuracy and reliability of diagnoses.

## Achieve

EasyDrive optimizes efficiency by allowing labs to effortlessly triage, sort, and organize finished projects. Pathologists can quickly retrieve and review slides, streamlining the entire diagnostic process and ensuring timely delivery of results.

## Integrate

EasyDrive supports international collaboration by connecting pathologists across different geographies and hospital networks. By providing interoperability for slide sharing and data management, it enhances global research efforts and ensures that the best possible patient care is achieved regardless of locations.
